**Abstract:** *This article analyzes the establishment, academic structure, educational programs, and international cooperation activities of Turon University. Particular attention is given to the implementation of multidisciplinary programs, including Philology, Economics, Pedagogy, Information Technologies, Medicine, and International Relations. The study examines the university’s contribution to regional human capital development and its integration into the international educational space. The findings indicate that Turon University is steadily developing as a modern higher education institution that meets national and international academic standards.*

**Keywords:** *higher education, academic development, medicine, international relations, international cooperation, regional development.*

**Annotatsiya:** *Ushbu maqolada Turon universitetining tashkil etilishi, akademik tuzilmasi, ta’lim dasturlari hamda xalqaro hamkorlik faoliyati tahlil*

qilinadi. Filologiya, Iqtisodiyot, Pedagogika, Axborot texnologiyalari, Tibbiyot va Xalqaro munosabatlar kabi ko'p tarmoqli yo'nalishlarning amalga oshirilishiga alohida e'tibor qaratilgan. Tadqiqot universitetning mintaqaviy inson kapitalini rivojlantirishga qo'shayotgan hissasi va uning xalqaro ta'lim makoniga integratsiyalashuv jarayonini o'rganadi. Natijalar shuni ko'rsatadiki, Turon universiteti milliy va xalqaro akademik standartlarga javob beradigan zamonaviy oliy ta'lim muassasasi sifatida izchil rivojlanib bormoqda.

**Kalit so'zlar:** oliy ta'lim, akademik rivojlanish, tibbiyot, xalqaro munosabatlar, xalqaro hamkorlik, mintaqaviy rivojlanish.

**Аннотация:** В данной статье анализируются становление, академическая структура, образовательные программы и деятельность в сфере международного сотрудничества Университета Турон. Особое внимание уделяется реализации междисциплинарных направлений, включая филологию, экономику, педагогику, информационные технологии, медицину и международные отношения. В исследовании рассматривается вклад университета в развитие регионального человеческого капитала и его интеграция в международное образовательное пространство. Результаты показывают, что Университет Турон последовательно развивается как современное высшее учебное заведение, соответствующее национальным и международным академическим стандартам.

**Ключевые слова:** высшее образование, академическое развитие, медицина, международные отношения, международное сотрудничество, региональное развитие.

Introduction. In the context of globalization, modernization of higher education and alignment with international standards have become strategic

priorities for national development. The expansion of private higher education institutions in Uzbekistan has strengthened competition in the educational sector and created broader opportunities for youth.

Located in the administrative center of Kashkadarya region — Karshi — Turon University plays an important role in expanding access to quality higher education at the regional level.

## Establishment and Strategic Objectives

Turon University was established in 2022 with the primary goal of preparing competitive specialists equipped with modern knowledge, professional competencies, and innovative thinking.

The educational process is organized based on the credit-module system. The integration of digital technologies, interactive teaching methods, and innovative pedagogical approaches enhances the effectiveness and quality of education.

## Academic Structure and Educational Programs

Turon University operates as a multidisciplinary higher education institution offering programs in the following areas:

**Philology:** Programs include Foreign Language Teaching (English), Uzbek Language and Literature, and Translation Studies. These programs aim to prepare qualified teachers and translators with strong theoretical and practical competencies.

## Economics and Management

The university offers programs in Economics, Finance, Accounting and Audit, and Management. These fields contribute to the development of regional business and financial sectors.

## Pedagogy and Psychology

Programs such as Primary Education, Preschool Education, and Applied Psychology are designed to prepare specialists for the education system.

## Information Technologies

Computer Engineering and Software Engineering programs focus on training highly qualified IT specialists capable of contributing to the digital economy.

Medicine: The establishment of the Medicine program represents a significant step toward strengthening the regional healthcare system. The curriculum includes fundamental medical sciences such as anatomy, physiology, and biochemistry, as well as clinical practice and laboratory training. This approach ensures the development of professional competence among future medical practitioners.

International Relations: The International Relations program provides students with in-depth knowledge of diplomacy, international law, geopolitics, and global economic processes. Graduates of this program are prepared to work in public administration, international organizations, diplomatic missions, and non-governmental institutions. This direction contributes to the development of regional and international cooperation capacities.

## International Cooperation

Turon University actively develops cooperation with foreign higher education institutions.

International collaboration is implemented through:

Student and faculty exchange programs

Joint research projects

International conferences and seminars

Professional development and training programs

Such partnerships contribute to improving educational quality, introducing advanced international practices, and expanding academic mobility opportunities for students and faculty members.

Regional Significance: Turon University significantly contributes to expanding access to higher education in the Kashkadarya region. The availability of strategic programs such as Medicine and International Relations plays an essential role in regional socio-economic development.

Graduates are actively employed in education, healthcare, public administration, and business sectors, thereby supporting sustainable regional growth.

Conclusion. The analysis demonstrates that Turon University has rapidly developed into a modern, multidisciplinary higher education institution open to international cooperation. The diversity of academic programs, including Medicine and International Relations, combined with expanding global partnerships, strengthens the university's academic potential and regional impact.

These factors position Turon University as a перспективе academic and educational center contributing to both national and international educational integration.
